New Products: BELTON B-10D / B-20D / B-20D-A

B-20D-A 

Product code: 102020001

B-20D 

Product code: 101860003

B-10D 

Product code: 101960001

We are pleased to inform you that our new pneumatic belt sanders “BELTON B-10D / B-20D / B-20D-A” will be released shortly.

Main features:

1. Improved operability and workability
The lever switch has been redesigned for improved grip comfort. Additionally, the grip, which was previously made of metal, is now coated with rubber to reduce cold feeling during use. This change also improves grip and contributes to better overall workability.
2. Compact and lightweight design
Compared to previous models, these new products are 3 to 5 percent lighter (excluding B-20D-A).
The B-10D is 21 mm shorter with a total length of 351 mm, while the B-20D and B-20D-A are 20 mm shorter with a total length of 446 mm, making them more compact.
3. Reduced exhaust noise (B-10D only)
The silencer has been shortened by approximately 20 percent, yet it still effectively reduces unpleasant high-frequency exhaust noise. This improvement helps create a better working environment.

For information regarding product availability, please contact your local Nitto Kohki sales representative.

Please note that our previous models “B-10CL / B-20CL / B-20CL-A” will be discontinued with the release of these products. The sales of the previous models will be ceased as soon as the stock runs out.

Model B-30CL remain unchanged within our product range, no change in design and performance due to production reason.

For further information, please refer to our catalog No. T23en-a and promotion video linked below.
