## **Damages Caused by Floods in Thailand (NOTIFY: Flood 3rd)**

Nitto Kohki group suffers damage caused by floods entailing the heavy rain in Thailand.  
Please be advised that the current status of our sites in Thailand as of February 2 as follows.

### 1. Main situations

Due to water exposure in the Rojana Industrial Park in Ayutthaya, the following production facilities are partially damaged and the operation is temporarily suspended.

However, drainage and clearing-up work of factories have completed, and have already carried out refurbishing operation of buildings presently aiming at early resumption.

#### (1) Nitto Kohki (Thailand) Co., Ltd.

- Major operation of this site: Production of Linear piston compressors and pumps
- Number of employee: 89.

#### (2) Nitto Kohki Coupling (Thailand) Co., Ltd.

- Major operation of this site: Production of Couplings
- Number of employee: 84.

### 2. Current Status of Alternative Production

Production of coupling, compressors and pumps operated in Thailand is being transferred to Tochigi Nitto Kohki Co., Ltd. in Japan.

Alternative production of couplings has been started sequentially in the last November and compressors/pumps have started December
